WHO WE ARE

GenZDecides is a group that advocates for and encourages political participation among members of Generation Z, because we've seen what's happened to our politics under decades of rule under older generations that don't have a grasp on the real issues we face. **We believe 21st century politics deserves 21st century voices.**

As our world rapidly changes before our eyes, our voice matters now more than ever. With a bevy of issues affecting younger generations in ways older generations can't or won't stop to understand, we realize our future depends on our generation's direct involvement with the political process at any and all levels. **GenZDecides is dedicated towards boosting voter turnout, organizing events, and raising awareness over the very real power our generation has to steer our nation towards a brighter future.**
